

SM201

Magnetic Contact Detector

The SM201 magnetic contact detector detects if a door or window is currently open or close. The detector consists of two parts: a sensor and a magnet . They are designed to be fitted to doors or windows with the magnet mounted on the opening part and the sensor mounted on the fixed frame. Opening and closing the protected door/window will trigger the detector and a signal will be sent to the gateway. The detector is a member of U-Net series of devices and is fully compatible with any U-Net enabled gateway.
